COVID 19

To Our Valued Customers,

Airfasco Industries Fastener Group manufacturing and distribution sites in North America are part of the Critical Manufacturing Sector <https://www.cisa.gov/critical-manufacturing-sector>

As such, we have been operational throughout the global pandemic.

However, as we've seen COVID-driven interruptions in the markets we serve, it has become necessary for us to scale our business activities with market demand. Our Ohio facility will maintain manufacturing operations with minimal support staff. Additional delays may follow in future months, depending on market demand, material availability, and potential shipping delays. Our objective is to maintain a strong and talented workforce while aligning our capacity with customer critical needs.

We will continue to run a small staff in key departments – including production, shipping, and customer service – to handle critical inquiries, production, and shipping requirements.

We thank you for your continued partnership and look forward to continuing to support and supply your business as we move forward through the Pandemic slowdown.

Respectfully,

Contact information noted below if you required additional information.
